

# UCD Center for Computational Mathematics Supercomputing Cluster

The CCM invites interested UCD faculty to join and take advantage of its resources:

- ◆ The Beowulf supercomputing cluster: 72 CPUs, 72GB memory, 2TB disk, for parallel applications, or run many programs simultaneously for massive experiments
- ◆ Linux servers and high-speed color printers
- ◆ Server and cluster software: Matlab, parallel software development tools, applications
- ◆ Professional system administration for reliability and user assistance

CCM members enjoy participation in

- ◆ Seminars, colloquia, and workshops
- ◆ Publication of technical reports
- ◆ Joint projects and proposals for external funding
