NOTICE FOR NON-DEGREE SEEKING STUDENTS

How courses taken for the Certificate *can* be applied to a graduate degree:

If you enter a graduate program for which you want to apply the credits earned, you may continue to count the credits earned for the Certificate toward any UC Denver graduate degree that also accepts them (for example, an M.S. in Applied Mathematics). However, before you are accepted into the graduate program, the required Certificate courses would have to be **transferred** to get their full credit in the graduate degree program. This transfer is limited to a total of 6 credits (2 courses).

For example, if you begin the Certificate program by taking MATH 4830 and MATH 5387, and you later decide to pursue an M.S. degree, you will be able to apply these 6 credits toward both the Certificate and the M.S. degree. However, you must be accepted into the M.S. program before you can also count additional credits taken as a non-degree seeking student.

Your signature below indicates that you understand this.

If you have *already been admitted* to the University as a **degree-seeking student**, send the following to the Department of Mathematical & Statistical Sciences (address below):

- This application, completely filled out (with dated signatures).

If you have *already been admitted* to the University as a **non-degree seeking student**, send the following to the Department of Mathematical & Statistical Sciences (address below):

- This application, completely filled out (with dated signatures).
- All official transcripts.

If you are *applying for admission* to the University as a non-degree seeking student, send the following to the Department of Mathematical & Statistical Sciences (address below):

- This application completely filled out (with dated signatures).
- A completed non-degree application (available at www.cudenver.edu).
- A non-refundable application processing fee of \$25 by check payable to *UC Denver*.
- All official transcripts.
