

MAKING UP DEFICIENCIES FOR YOUR CU-DENVER MATH COURSE

If you have not already read "HOW TO PLACE YOURSELF IN A CU-DENVER MATH COURSE" and have taken a placement test, you should do that now. If you did well on your placement test, you should be prepared for your course of choice. If you did poorly on the placement test you have two options. You can choose to register in a lower level course. Or, you might try to study the material in which you are weak, and take the placement exam again. The following is a list of textbooks from which you may study.

TO PREPARE FOR:

Math 1070. You should study the material in *Intermediate Algebra*, by Lial, or take CCD Math 105.

Math 1080. You should study the material in *Finite Mathematics*, 5th edition, by Barnette and Ziegler, Chapter 2,3, and 5.

Math 1110. You should study the material in *Intermediate Algebra*, by Lial, or take CCD Math 105.

Math 1120. You should study the material in *College Algebra and Trigonometry* by Demana and Waits, Chapters 1-6, or take Math 1110.

Math 1130. You should study the material in *College Algebra and Trigonometry* by Demana and Waits, Chapters 1,2,3, and 7. Otherwise you should take Math 1110 if your weakness in Algebra, or Math 1120 if your weakness is in trigonometry.

Math 1401. You should study the material in *Precalculus*, 2nd Edition by Lanson and Hostetler, Chapters 1-7. Otherwise take Math 1110 (algebra) and Math 1120 (Trigonometry) or take Math 1130 (Precalculus).

These texts are available for reference in the library and for purchase in the campus bookstore.
