

**MATH 2421-001 MathZone Update**  
Summer 2006

Mike Kawai

(#1) Due to the added cost of MathZone from the publisher (McGraw-Hill), I am forced to make MathZone an *optional* activity.

If you choose to do MathZone, then you can replace lost homework and quiz points by completing the on-line quiz questions at the rate of 2 points per question. Typically, there are 4 or 5 questions from each textbook section.

You may have 3 attempts at each section quiz.

Be aware that there is a deadline for each section quiz.

(#2) Log on to [www.mathzone.com](http://www.mathzone.com).

Select our textbook “Smith/Minton Calculus: Concepts & Connections”.

Enter your Student Access Kit code, or buy one for \$30.00.

The correct section enrollment code is: **713-39-1D1**.

It should say “MATH2421-001 [Summer2006]”.

(#3) You can also sign up for “NetTutor” if you would like to chat with on-line tutors about our homework problems!
